Project 1: UGPrep

The goal of this project is to help students for their undergraduate study. Student can find course material like slides, books, lecture video, etc. They can post about their problems to discuss with others. Also, they can chat one to one. They can share their own notes and videos. They can see course reviews from previous students and also give reviews for upcoming ones. They can track their schedule for proper study. Also, student can communicate with teachers if needed.

Project 2: HallBook

The goal of this project is to solve the problems of the hall students. Students can request for their needs like table, fan, bookshelf, etc. There will be a discussion platform for mass students and a trending page for the important topics. Students can vote, create event, etc. Students can give announcement about any topic or fest. Authority can also post their plans. Again, authority can also track of library, dining and student presence.
